331 PULSE, the most powerful in the PULSE range, is a HEPA-certified vacuum cleaner designed to meet customers' demand for a competitive vacuum cleaner, ensuring good suction performance, and the best possible filtration. The renewal of the design with the installation of the motors in the lower rear has allowed the creation of a low, compact and very manoeuvrable vacuum cleaner for easy transport. The center of gravity, moved lower, has also made the vacuum cleaner much more stable.
